

2018 SciTech Lecture Series

Physiological Insights into Novel Therapies for Nephrogenic Diabetes Insipidus

presented by

Jeff M. Sands, M.D.
Emory University

Thursday, October 18

4:00 p.m.

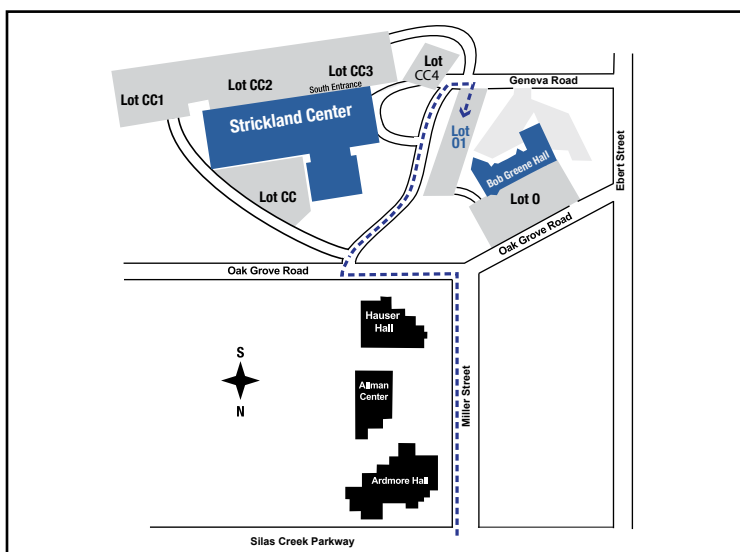

Strickland Auditorium

Robert L. Strickland Center

Forsyth Tech Main Campus

2100 Silas Creek Parkway, Winston-Salem, N.C. 27103

Enter campus on Miller Street and go to the end of the street. Turn left onto Oak Grove Road and then turn right into the first drive.

To reserve a seat at this event:

Mary Flournoy: 336.757.3812, mflournoy@forsythtech.edu

Russ Read: 336.734.7651, rread@forsythtech.edu

A graduate of Harvard College and Boston University School of Medicine, Dr. Sands trained in Medicine at the University of Chicago and the National Institute of Health's National Heart, Lung, and Blood Institute (NHLBI). Following fellowship training in the Laboratory of Kidney and Electrolyte Metabolism at NHLBI (NIH), he proceeded to a clinical nephrology fellowship at Emory University. Joining the Emory faculty as an Assistant Professor in 1989, Dr. Sands was promoted to Associate Professor and then Professor. He accepted the Kokko Professorship and Division Director position at Emory in 2002. He served as Executive Vice-Chair of Medicine from 2009-2015, and as Associate Dean for Clinical and Translational Research from 2006-2010. He is a co-founder of Nephro DI Therapeutics and is considered a Key Opinion Leader for nephrogenic diabetes insipidus by the National Organization of Rare Diseases.
